A Conversation with Alfresco

Amazon Echo provides voice access to all kinds of content

... like Wikipedia, News, Sports, Music and more

Echo just needs a teacher

So Why not **Alfresco?**

Teach Echo to understand how we speak

ALFRESCO_STATUS

Sample Utterances*
Phrases end users say to interact with th[e]
For more information, see Defining the Voice Interface f[or]

```
1  Available Is Alfresco {status}
2  Hello My name is {name}
3  Hello Who am I
4  Goodbye goodbye
5  Document Read document {number}
6  Sites List My Sites
7  UseSite Use the Site {site}
8  Tasks Show My Tasks
9  Tasks Approve Task {number}
10 Tasks Disapprove Task {number}
11
```

... write a little Lambda

```
function getDocumentReadResponse(int
session, callback, documentUrl) {
    var request = require("request");
    var speechOutput="";
    request(documentUrl, function(error,
response, body) {
    if (response.statusCode === 200)
        {
            speechOutput += "I found your
document.  Here is the content. " + body;
        }
        callback(session.attributes,
buildSpeechletResponse(intent.name,
speechOutput, null, false));
    })
}
```

... then talk with Alfresco
